

Date : 29 Aug 2005

What's been achieved already:-

- Log compression for multi-char inserts + deletes
- IT/ET for single-char inserts
- IT/ET for single-char inserts + deletes
- IT/ET for assignment operations
- IT/ET for effects document for single-char moves
- IT/ET for single-char moves
- IT/ET for multi-char inserts
- IT/ET for multi-char inserts + deletes

TODO

- Allow for effective representation of multi-char inserts + deletes + moves
- Log compression for multi-char inserts + deletes + moves
- IT/ET for multi-char inserts + deletes + moves
- IT/ET for multi-char inserts + deletes + moves + tracking
- OpTransTest implements a connection based (ie sessions) control algorithm. Test, then update "paper" on control algorithm.
- Apply new algorithms to ceda
- IT/ET for set,bag,map operations
